# SAY HELLO TO FLOR® SQUARES FLOORCOVERING FOR REAL LIFE.

Often it's furniture that defines the room in open living spaces. We like using FLOR to support the notion of one big room with two related functions. We've added softer textures under the dining table where you'll be rubbing your toes and darker more durable textures around the kitchen island. Try that with a conventional rug.

We like the way FLOR fits in real homes and real lives - a system of coordinating 19.7" squares in a range of colors and patterns that fit any style and any space.

*This bike is often parked right here in the dining room, when it's not being ridden.*
